GRAZING SCHOOL: MANAGING GRAZING RUMINANTS FOR FUELS REDUCTION

WITH GRAZING SPECIALIST SARAH KEISER

SEPTEMBER 27, 2025

Are you tired of weed whacking and mowing to manage vegetation? Come learn about prescribed grazing!

JOIN US to learn about prescribed grazing and how to manage livestock for fuels reduction to prevent wildfire! Grazing animals consume fuels (grasses and forbs) lessening the amount of fuel available for wildfires.

Prescribed grazing and grazing cooperatives are an alternative to mechanical fuels reduction with co-benefits of weed management, soil health, and reduced erosion.

LOCATION

Putah Creek Rd - Winters, CA

TIME

9 am to 1 pm

NO COST TO ATTEND – limit 25 attendees

TOPICS COVERED

- Prescribed grazing basics
- Fencing and watering
- Grazing cooperatives
- Basic animal husbandry
- Hoof trimming
- Inoculation
- Small ruminant health
